

## Togg Integrated Management System Policy

On the way we set out to create an automobile brand that will compete on a global scale and whose intellectual property right is owned by Türkiye, we are creating connected and electrified new generation cars and establishing a mobility ecosystem around them.

We believe that sustainable and persistent success will be achieved by implementing systems for quality, environment, occupational health and safety and energy managements in a continuous improvement mindset.

In this context, we undertake:

- To take precautions by managing risks within the scope of quality, environment, occupational health and safety and energy as from the project stage by using new or improved technologies related to our products, services, and activities in the Togg mobility ecosystem,
- To reduce our environmental impacts and prevent environmental pollution by controlling the consumption of raw materials, energy, and natural resources,
- To use energy efficiently by increasing the renewable energy rate and applying innovative solutions in our facilities,
- In line with our zero-accident policy, to create a Togg Occupational Safety Culture in which the employees take an active role with the awareness of permanence of health and establish a working environment where everyone is safe and well,
- To increase company performance and efficiency of all processes,
- To ensure the participation and cooperation of all our stakeholders in our policy by creating an open communication environment on quality, environment, occupational health and safety and energy,
- To comply with the legislation and other applicable requirements from relevant parties in all processes,
- To ensure the satisfaction of all our users by providing “mobility solutions that are fully compliant with the highest quality standards in their field and relevant legislation” in the Togg mobility ecosystem,
- To support and develop our business partners.

Within the scope of this policy, we are committing to implement all the necessary action plans and to provide all the necessary information and resources to realize above-mentioned engagements.
