

## Togg – End-of-Life Vehicle Recycling

In line with its sustainability vision, Togg collaborates with authorized partners to ensure the environmentally responsible and legally compliant recovery of end-of-life vehicles.

By returning your end of life vehicle through our authorized take-back network, you can contribute to the protection of nature while also ensuring that your vehicle is recycled in accordance with applicable regulations.

In Germany, Togg cooperates with **Mitteldeutsche Autorecycling (MAR)** to facilitate the environmentally friendly and legally compliant recovery of end-of-life vehicles.

### Free Vehicle Take-Back Conditions:

Vehicles can be returned free of charge to our authorized collection points provided that the following conditions are met:

- The vehicle must be classified as M1 (passenger vehicles with up to eight seats excluding the driver) or N1 (light commercial vehicles up to 3.5 tons).
- All key components such as the engine, transmission, chassis, body, catalytic converter, and electronic control units must be intact.
- The vehicle must not contain waste or inappropriate materials.
- The vehicle must have been registered in an EU Member State for at least one month before being decommissioned.
- Registration documents must be submitted at the time of return.

When your vehicle and registration documents are handed over to our partner's collection facility, you will receive a Certificate of Destruction confirming that the vehicle has been disposed of and recycled in compliance with legal requirements. This certificate is necessary for the cancellation of your vehicle's registration with the relevant authorities.

### Contact Information:

To return your end-of-life vehicle free of charge, you can contact **MAR** directly:

- Phone: 0800 114 2 114
- Website: <https://einfachabgeben.de/>
- Business days and hours: Mo. – Thu. 7 am – 5 pm ; Fr. 7 am – 4 pm

Up-to-date information on authorized collection and drop-off points is also available on MAR's website.

Togg is obliged, under the German *End-of-Life Vehicle Ordinance*, to meet annual recycling targets and to publish related performance data. For detailed information on Germany's official recycling rates, please visit the website of the **Federal Ministry for the Environment**.
